10/07 Form 106

Generic Specification for Utility/Excavation work in or around County Paved Roads.
(Supplement to Permit)

- A. Traffic Control per MMUTCD. Barricade any open excavation within Right-of-Way with Lighted Type II barricades.
- B. Backfill shall be compactable fill similar to excavated soils or Class II granular material. If Clay is used in bottom of excavation, a minimum of 3 feet of Class I1 sand will be utilized near the surface. All backfill shall be compacted to 95% of its maximum dry weight.
- C. The road bed shall be reconstructed to similar cross-section as was removed, but as a minimum shall be:
 - BASE: 6' - 22A gravel (compacted to 98% of its max, dry unit weight)
 - SURFACE: 250 lbs./yds. - Hot Mix Asphalt.
- D. Miscellaneous: Any hard surfaces shall be cut with wheel or sawed to create a neat joint. MDOT Standard Specifications for Construction, 1990 edition, shall prevail.
